Fuad Ahwal

Millbrae, CA   (650) 302-5285   fuadahwal@gmail.com

www.linkedin.com/in/fuadahwal www.github.com/fuadahwal www.Fuad.io

Objective:

Obtain an entry level front end engineering position utilizing my UI/UX skills.

Education:

B.A. General Biology	January 2015
San Francisco State University, San Francisco, CA	
Certificate of Achievement	June 2017
Coding Dojo, San Jose, CA	

Skills:

Javascript , ReactJs, React-Redux, Ruby, Node, Express, Git, MySql, HTML, CSS, Wordpress

Projects:

Zombie Bird:

A javascript, CSS, HTML game where the player is a zombie cancer, that must infect other birds before host bird runs out of brain juice.

Also utilizes a radar system which tells you when your close enough to another bird to safely transfer.

Project Meal:

An eBay inspired e-commerce website built using Ruby that specializes in locally home grown fruits and vegetables, that is geo-restricted to show only local listings.

Utilizes Stripe API to handle payments, while using Mailgun to handle email automation services and MySQL for the database.

Band Wagon:

A React with Rails app that shows local hotels, restaurants and bars on a map, near venue locations, so you can easily follow your favorite band while on tour.

Implemented React on the front end by using the reactrails gem.

Travel Guide:

A Javascript, CSS/HTML travel guide that shows users local places of attraction as well as users can search for nearby places.

Using Google Maps API to display a map for the user, with search result locations marked on the map. Also uses New York Times API to display news articles from local area in the sidebar.

Professional Experience:

Freelance Full-Stack Software Engineer   **Mar. 2015 - Current**

Worked with local businesses as well as clients found through Upwork and Craigslist to produce websites that exceed their expectations.

Technologies used include HTML, CSS, Javascript, ReactJS, React-Redux, Ruby on Rails, Wordpress, Python and various libraries and API's.
